

# Isaac Hawkins

Frontend Web Developer

## Frontend Projects

### Grumble

Single-page, interactive web application that returns restaurant prices, location, and cuisine type based on user input using Zomato and Google Maps APIs.

Tools: HTML, CSS, JavaScript, jQuery, AJAX, APIs

### Johnnyswim Fan Page

Using Bootstrap, I replicated my favorite bands entire website replete with images, videos, merchandise store, and a contact form.

Tools: HTML, CSS, Bootstrap

### Halo RPG

A single-player game that uses logic to overcome the defenses of three other characters with different strengths and health levels. This project required a strong knowledge of JavaScript and jQuery to switch between characters and keep track of each character's health and attack strength.

Tools: HTML, CSS, JavaScript, jQuery

## Professional Experience

### Residence Life Coordinator

1/ 6/ 2014 –1/4/2017

Towson University | Baltimore, MD

- Organized over 20 student employees, assisting them in their community building efforts and educational programming initiatives.
- Designed and developed our buildings Sharepoint website for students to have access to relevant information and event details.

### Resident Director

1/2/2012-1/2/2014

Howard Payne University | Brownwood, TX

- Planned and implemented recruitment, selection, training, and evaluation of programs for 50 paraprofessional staff members.
